Software Developer

Passionate about learning and educating other in the field of innovation and technology

Project

Total Holiday Options - software developer
Sai enclave, Sector-23, Dwarka, Delhi • 24 April 2023 — present

Full Stack Developer | Travel & Tourism ERP Solutions
Technologies: Laravel, Next.js, JavaScript, jQuery, Bootstrap, Tailwind CSS, REST APIs

Core ERP Development (Multi-Regional System)
Developed and optimized a comprehensive ERP serving the travel industry across India, Sri Lanka, Australia, New Zealand, Maldives, and Nepal.

- Module Management: Contributed to a complex ecosystem including Hotel Management, Activity/Guide/Transport Providers, and Independent Accounting systems.
- Document Engineering: Engineered an enhanced PDF and Word document generation system using a single-source HTML template in Laravel.
- System Enhancements: Implemented an image processing suite (Logo upload & Cropper) and overhauled the Admin Panel UI for better user experience.
- Inquiry Management: Built a robust backend system to capture and manage website inquiries, streamlining the lead-to-booking pipeline.

Dynamic Quote & Tour Management System

- Component-Based UI: Developed a high-performance Quotation and Itinerary builder using a jQuery component-based architecture.
- Real-Time Data Flow: Integrated real-time data synchronization between the UI and backend to ensure instant pricing updates and itinerary changes.
- Performance Optimization: Refined backend logic to ensure fast response times for complex tour costing calculations and large-scale data sets.

Web & Mobile Ecosystem Management

- API Development: Architected and maintained a suite of Laravel-based REST APIs powering mobile and web applications for "Total Holiday Options" (Websys).
- Portfolio Design: Designed and deployed the "Digilution" portfolio website using Next.js for a modern frontend and Laravel for a secure backend.

India DMC (Destination Management Company) Website
Built a B2B-focused platform designed for on-the-ground logistics and service management.

- Headless Architecture: Developed a high-performance frontend using Next.js powered by a secure Laravel CMS via REST APIs.
- Operational CMS: Built backend tools for publishing real-time tour details, managing dynamic widgets, and customer inquiry tracking.
- API Development: Wrote custom REST APIs for dynamic menu creation, regional tour listings, and automated contact form processing.
- Localization: Optimized the platform for multi-country SEO (India & Sri Lanka) to ensure high visibility in diverse markets.

Tailor-Made India Platform
Developed a customer-centric, "from scratch" B2C website focused on highly personalized travel planning.

- Engineered a Next.js frontend that allows users to explore "Tailor-Made" options through dynamic tour and itinerary listings.
- Real-Time Costing UI: Developed a component-based UI using jQuery and Laravel to handle complex, real-time pricing and tour costing calculations.
- Data Flow Optimization: Enhanced backend response times for costing engines, ensuring seamless data flow between the user's selections and the final quote.
- Lead Management: Integrated custom API endpoints to capture highly specific customer preferences for personalized itinerary drafting.

Project

EventBano- web devlopement
Freelance/Project-Based

- Built a professional B2C website for **EventBano** using the Laravel framework.
- Transformed the platform from a basic site into a clean, modern interface that clearly showcases services and product offerings to customers.
- Used Laravel Blade templates to build a structured website that is easy to update and add new features to as the business grows.
- Ensured the site is fully responsive, meaning it looks perfect and works smoothly on smartphones, tablets, and desktop computers.
- Managed the hosting and deployment on Hostinger, ensuring the website stays online and loads quickly for all visitors.
- Implemented SEO and performance tweaks to help the site get discovered by more users looking for event and rental services.

Authentication System & File Upload API
New Delhi • 01 Aug 2024 – 1 Sept 2024

- Developed login and registration APIs using Node.js and Express.js.
- Implemented MongoDB for storing user data securely.
- Designed a file upload API integrated with Cloudinary for efficient file storage.
- Utilized token generation (JWT) for enhanced security and user authentication.
- Deployed the application using GitHub for version control and Vercel.

Portfolio - view
New Delhi • 01 Feb 2024 – 20 June 2024

- Designed and developed a portfolio website using Next.js, HTML, CSS, Bootstrap, and jQuery.
- Integrated SMTP to receive queries directly via email.
- Used Git for version control and deployed the portfolio on Vercel for seamless hosting..

MLM Management System - web devleopment
Freelance/Project-Based

- Designed a web application with an Admin view using HTML, CSS, Bootstrap, and Laravel.
- Implemented an admin login system and a data table for database management.
- Developed REST APIs for efficient front-end and back-end communication.

Internship
